## How to set a woods heavy duty timer

How to Program a Woods Outdoor Digital Timer Having an outdoor digital timer gives you control over when your outdoor lights and appliances go on and off and you can set multiple on/off programs for different days of the week. Any type of outdoor lighting could use a timer. Whether it's your garden lights, lamp posts or the security flood light over your garage, outdoor digital timers help ensure you're never in the dark. A Woods outdoor digital timer is a dual-outlet timer with a 2-foot cord, a grounded plug and a weatherproof housing designed to withstand exposure to the elements. This timer is designed to turn on and off outdoor equipment, such as landscape lighting, holiday displays, appliances and fountain pumps. It can also handle heavy-duty applications, such as switching on electric motors up to 1 horsepower. The Woods outdoor digital timer also features a digital liquid crystal display and can be programmed to actuate as many as seven on/off events daily. Your Woods outdoor digital timer can be used for a variety of appliances and yard features. You can set the timer for pools and spas, water heaters, fountains and waterfall pumps, and even your sprinkler system. In addition, when the holidays roll around, outdoor timers are very useful devices to have. Things You Will Need + Woods digital timer Fresh batteries on hand Press the PROG button once. This will automatically display the first On/Off setting. Step 2: Set the Desired Time. Press the minute and hour buttons as necessary, to the desired time. If you need to change from am to pm, toggle 12 times. Step 3: Change the Day Setting. If needed, press the DAY button to choose the day or group of days that you want. Once you've selected the correct day(s), press the PROG button again to display the On/Off setting. Select OFF. Step 4: Repeat. Repeat this process to create the OFF setting, and repeat Steps 1 through 3 for additional On/Off settings. Step 5: Exit This Mode. To exit the program setting mode, simply push the CLOCK button. Always check the specifications of your timer for the maximum wattage that it can withstand before using it to control your lighting or outdoor device. Outdoor digital timers are easy to program, and they always come in handy. Whether you're using your Woods timer for holiday lights, garden or pool lights, or your security system, being able to control your outdoor lighting is very convenient. © 1996-2014, Amazon.com, Inc. or its affiliates Charge the Battery: Plug the timer into wall outlet for 10 minutes to charge internal battery. Note: You can then unplug the timer from the wall outlet and comfortably hold it in your hand to program the timer. Clear the Memory: Press the R button with a toothpick to erase any previous settings. To Set the Current Time: Press and hold the CLOCK button. At the same time, press the HOUR and MINUTE button as many times as necessary to advance the display to the correct time. Hold down the DAY button until the display shows the correct day. To Program the Timer: Press the PROG button once to display the first ON/OFF setting "1 ON ---". Press the MINUTE and HOUR buttons as necessary to set the ON time you want. To change from AM to PM toggle 12 times. Press the DAY button as necessary to choose the day or group of days you want for the time setting. Press the PROG button again to display the second ON/OFF setting "1 OFF ---". Repeat the procedure to create the OFF setting. Repeat Steps 1 thru 5 for additional ON/OFF settings. Press the CLOCK button to exit program setting mode. Review On/Off Settings: It is important to review all 20 settings, even if you only used a few, to make sure there are not extra, unintended settings. Press the PROG button (hold down to scroll) until the display cycles through all 20 ON/OFF pairs. Stop on any setting you want to remove or change. To Revise a Setting: Press the PROG button (hold down to scroll) until the display shows the setting you want. Press the HOUR, MINUTE and DAY buttons as necessary to revise the displayed ON/OFF time and day(s). To Remove or Restore a Setting: Press the PROG button (hold down to scroll) until the display shows the setting you want to remove or restore. Press the RST/RCL button. If removing, the display will replace the setting with dashes. If restoring, the display will show the previous setting. To Connect/Operate the Timer: Plug device in to the timer and turn the device on. Plug timer into wall outlet. To Override the Timer: Press the ON-OFF button as necessary to display: "ON" - the plugged in device is switched on permanently. "OFF" - the plugged in device is switched off permanently. "AUTO" - the plugged in device follows your programmed timer settings. Random Setting Security Feature: When the timer is in AUTO mode ("AUTO" shows in the bottom center of the display) press the CLOCK button once. Then press and hold the HOUR-RND button for 3-5 seconds. "RND" will appear next to the minute on the display. The random setting function will turn the plugged in device(s) on and off at random. The device will turn on for about 10-26 minutes and turn off for about 26-42 minutes at random. The random function will override any on/off preset programs. To cancel the random function, press and hold the HOUR-RND button again for 3-5 seconds and the "RND" will disappear from the display. Countdown Setting: Press the PROG button (hold the button down to scroll) and cycle thru all 20 settings until you reach the countdown setting "d ON ---" or "d OFF ---". Press the HOUR and MINUTE button(s) to set the countdown time. Press the CLOCK button, then press and hold the RCL-CD button for 3-5 seconds to activate the countdown function. "CD" will flash in the lower left corner. After the countdown period is over, the device will turn off. To turn off the countdown function press and hold the RCL-CD button for another 3-5 seconds when in the CLOCK mode. Daylight Savings Time Feature: Press and hold the CLOCK-DST for 3-5 seconds to advance the time of day one hour for daylight savings time. "DST" will appear to the right of the minute on the display. Press and hold the CLOCK-DST button again to set the time back one hour and "DST" will disappear. Shop Now
